

Summary of Findings - Customer Retention Analysis for Alt Mobility

Project Objective

The purpose of this analysis was to assess customer retention trends over multiple years using cohort-based methodologies. By understanding how cohorts of customers behave over time, Alt Mobility can better tailor customer engagement, retention strategies, and marketing investments.

Key Insights from SQL Analysis

1. Cohort Modeling:

Customers were grouped into cohorts based on the year of first purchase (2020-2025). Repeat purchases were tracked in subsequent years using SQL logic.

2. SQL Output:

- Each cohort was evaluated across up to 6 years of follow-up data.
- Year-wise counts of repeat purchases were calculated using time-differenced joins and aggregation.
- SQL results were structured into a matrix form for visual interpretation.

Observations from Customer Retention Trends

1. Strong Retention in Early Cohorts (2020-2021):

- The 2020 cohort had the highest total repeat purchases at 699.
- The 2021 cohort followed closely with 550 repeat purchases.

2. Decreasing Engagement in Recent Cohorts:

- 2023 cohort had only 229 total follow-up purchases, with further decline in 2024 and 2025.

3. Cohort Size vs Retention Ratio:

- The 2020-2022 cohorts retained 130-140+ customers annually.
- 2023 onward dipped below 100.

4. New Acquisition Drop:

- 2025 data shows only 7 new customers, suggesting possible data incompleteness or a major decline.

Recommendations for Alt Mobility

1. Re-engagement Strategy for Recent Cohorts:

- Target 2022-2024 cohorts through loyalty campaigns or exclusive offers.

2. Improve Onboarding and First-Year Experience:

- Strengthen the first 90-day experience with tutorials or onboarding incentives.

Summary of Findings - Customer Retention Analysis for Alt Mobility

3. Customer Feedback Loop:

- Use surveys to identify reasons for churn in recent cohorts.

4. Boost Acquisition Efforts:

- Analyze and improve acquisition strategies across digital channels.

5. Data Continuity:

- Ensure tracking includes full customer lifecycle data for accurate LTV estimation.

Conclusion

This cohort analysis underscores the value of long-term customer engagement. Retention is strongest in the first few years, and strategic improvements in onboarding, acquisition, and loyalty programs can significantly boost customer lifetime value for Alt Mobility.
